General Description

Design, ergonomics and ease of use, together with outstanding decoding performance and state-of-the-art software configuration capability, make FireScan™ an ideal solution for Retail, Office Automation and Light Industrial applications that require higher reading distances (over 40 cm) and a bright, well-defined scan line.

FireScan™ is based on a new empowered architecture which allows the most advanced features to be employed. In terms of decoding, the implementation of PUZZLE SOLVER™ technology improves reading of poorly printed or damaged codes, while the Data Editing and Data Formatting function allows scanned data to be modified prior to transfer, ensuring compatibility with the application on the host system. Furthermore, the aiming system permits easy pointing on the code at higher distances.

In addition, the in-field update capability provided by FireScan™ guarantees your investment: the laser gun firmware can be easily updated, maintaining an always “up-to-date” device.

FireScan™ is available in three models with different interface sets: the standard D131 model provides all the typical connections (USB, RS232, WEDGE & WAND), the D111 model provides complete connectivity to main IBM46xx cash registers, and the D141 model performs undecoded reader applications (ex. connecting the reader to flatbed scanners). In addition, FireScan™ reads Reduced Space Symbologies (RSS), an emerging symbology that can be printed on a smaller label, which meets emerging market needs for a greater amount of data on a symbol.

Features

- Aggressive reading
- Multi-interface models
- Complete Data Editing and Formatting
- Firmware upgrading
- Intuitive barcode aiming
- Ergonomics and lightweight
- RSS-14 decoding capability
- Sunrise 2005 Compliant

Applications

- Distribution & Retail
- Front-office applications
- Light Industrial environments

**Specifications**

**ELECTRICAL CHARACTERISTICS**
- POWER SUPPLY: 5 VDC ±5% - 4.75-14 V
- CONSUMPTION: 200 mA max. (FireScan™ D111/D131)
- 180 mA max. (FireScan™ D141)

**MECHANICAL CHARACTERISTICS**
- WEIGHT (approx.): 200 g
- CASE MATERIAL: ABS and Polycarbonate
- CABLE LENGTH: 2 m (6.1 ft.) linear or coiled

**PERFORMANCE**
- LIGHT SOURCE: Laser diode 630 to 680 nm
- MAX. RESOLUTION: 0.12 mm (5 mils)
- SCAN RATE: 35 (±5) scans/sec.
- MIN. PRINT CONTRAST RATIO: PCS = 15%
- READING FIELD: See diagram
- READING ANGLE: Skew: ±60°, Pitch: 5 to 55°, -5 to -55°, Tilt ±20°
- READING INDICATORS: Laser on and Good Read light, adjustable tone "beeper"

**PROGRAMMING METHOD**
- Manual
- Automatic (with RS232)
- DL Sm@rtSet™
- S/W commands through the serial port

**ENHANCED FEATURES**
- Puzzle Solver™, data editing and data concatenation

**INTERFACES**
- FireScan™ D111
- FireScan™ D131
- FireScan™ D141

**LASER CLASSIFICATION**
- Class 2 (EN60825-1/ CDRH)

**ENVIRONMENT**
- AMBIENT LIGHT CONDITIONS: Immune to light exposure in offices and facilities, and direct exposure to sunlight
- OPERATING TEMPERATURE: 0 to 50 °C
- STORAGE TEMPERATURE: -20 to 40 °C
- HUMIDITY: 90% non condensing
- DROP RESISTANCE: IEC 68-2-32 Test ED; withstands repeated drops from 1.5 m onto a concrete surface
- ENVIRONMENTAL PROTECTION: IP30

**Dimensions**

**Reading Diagram**

**Accessories**

**Stand**
Robust and compact, the stand makes it possible to use the reader in a hand-free mode.

**Desk/Wall Holder**
This item provides ease of use and flexibility in many environments where work space is limited.
