The IMAGETEAM™ 46002D area imager from HHP combines the versatility of area imaging with the speed and cost of linear scanning for retail and commercial applications. Powered by Adaptus™ imaging, the IT46002D is full featured, fast, and cost effective.

Current and future retail and commercial applications will involve much more than linear bar codes. EAN-UCC composite codes are beginning to appear in food stores, PDF codes are used for age verification in restricted item sales. Postal bar codes are used to sort mail. The omnidirectional reading capability of the IT46002D allows fast and easy reading of all these codes. Simply point and shoot. There's no need to align a scan line, or wait for a raster beam to open up.

Whether capturing a signature as proof of delivery, taking a picture for identification, or electronic data storage, image capture is an important part of current and future solutions. The Adaptus powered IT46002D is equipped with HHP’s fourth generation imaging for best-in-class image quality and image transfer speed, all at very economical prices. Image capture has become a mainstream application requirement. Trust HHP to provide the industry’s best imaging.

With no moving parts, the IT46002D is as durable as it is versatile. HHP has a reputation for products that are tough as nails. The IT46002D is no exception, and will provide years of service at a low cost.
