Hand Held Products’ IMAGETEAM 4620 (IT4620) combines exclusive Adaptus Imaging Technology with Bluetooth wireless connectivity to provide a truly unique and durable imager for retail and commercial cordless bar code reading.

In applications where operators must move about to read bar codes, cables become a limiting factor. They cause inefficiencies or safety and ergonomic concerns. Cable length often limits working range, resulting in an object being moved to the reader because the reader can’t be taken to the object. With cordless bar code reading, operators have freedom of movement required to quickly, safely, and ergonomically read bar code data. With a 33 foot (10m) working range and Adaptus Imaging Technology, the IT4620 has the right combination of performance and features.

Having the right performance is only part of the solution; staying in service is just as important. The IT4620 also has class-leading durability. It was designed to survive in real world mobile applications. Hand Held Products is committed to creating some of the most rugged products available, and the IT4620 is another example of that commitment. With no moving parts and a robust housing design, the IT4620 will easily provide years of service in retail and commercial environments, creating a favorable total cost of ownership.
